

AI Internship – Development Environment and GitHub Setup Report

Student Information

Name: Abdul Rehman

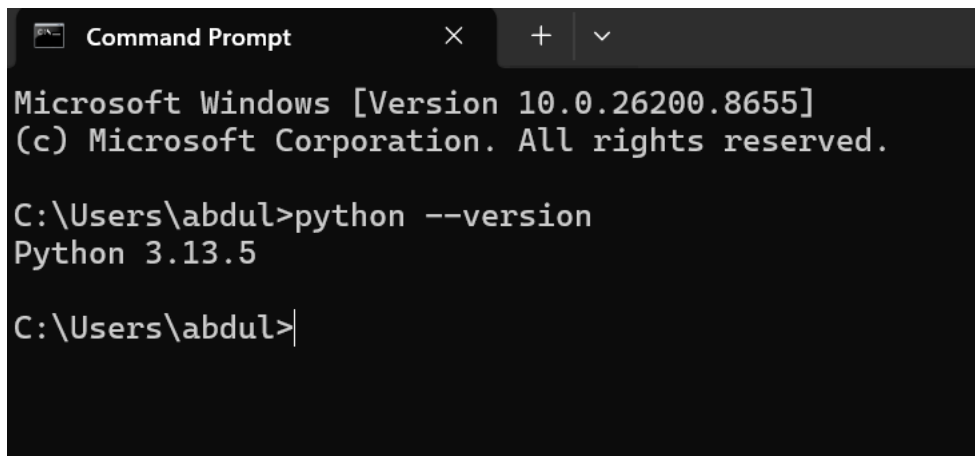

Batch: 2026

Domain: AI & Software Development

Part A – Development Environment Setup

1. Python Installation

- Installed Python version 3.11 or above.
- Verified the installation using the following command:

```
Command Prompt
Microsoft Windows [Version 10.0.26200.8655]
(c) Microsoft Corporation. All rights reserved.

C:\Users\abdul>python --version
Python 3.13.5

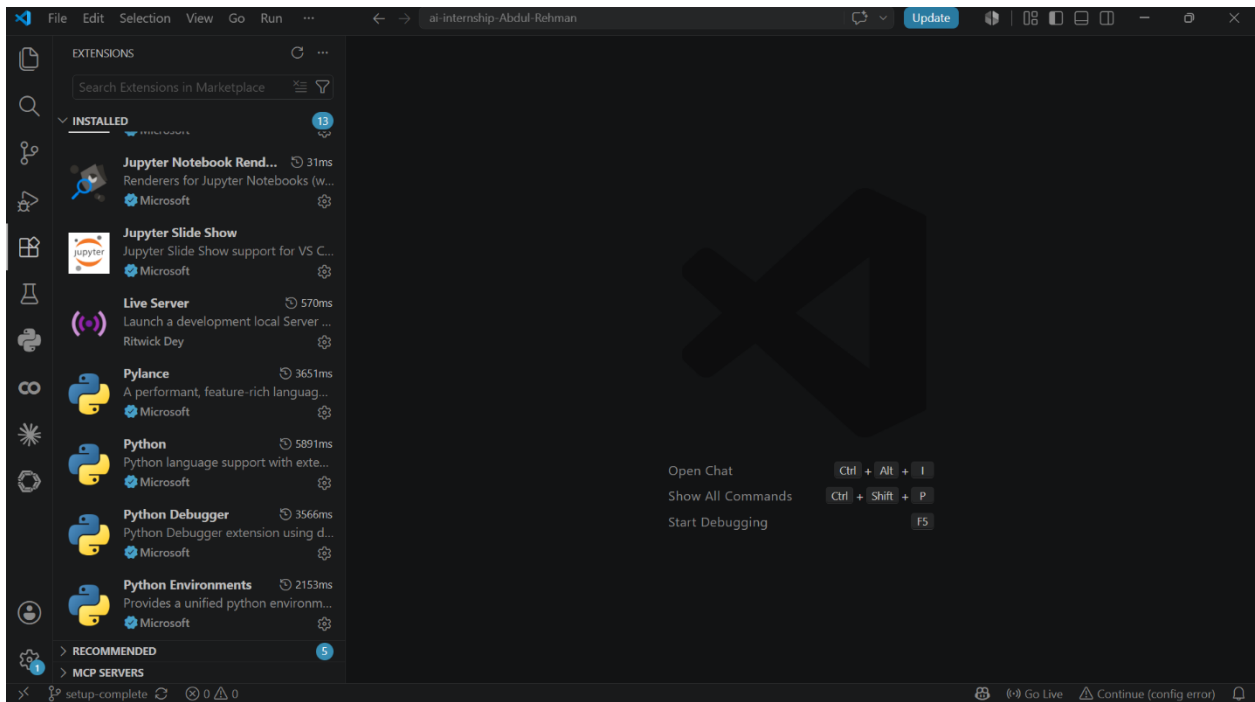

C:\Users\abdul>
```

2. Visual Studio Code Installation

- Installed Visual Studio Code as the development environment.

Installed Extensions

- Python
- Pylance
- Jupyter
- GitLens

3. Virtual Environment Setup

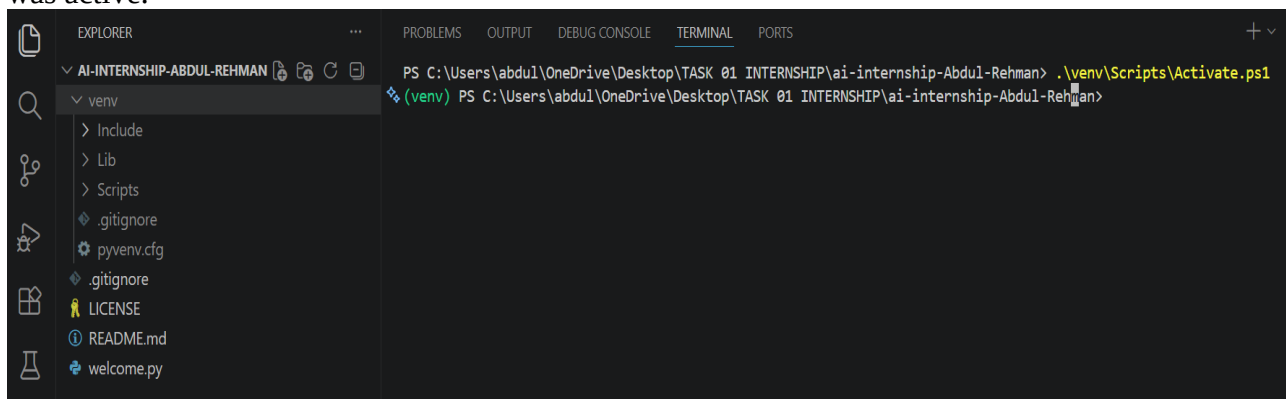

Created a Python virtual environment using the following command:

- `python -m venv venv`

Activated the virtual environment in PowerShell using:

- `.\venv\Scripts\Activate.ps1`

After activation, the terminal displayed the (venv) prefix, confirming that the virtual environment was active.

Part B – GitHub Repository Setup

GitHub Repository

- Created a GitHub repository named:
ai-internship-yourname
- Cloned the repository to the local machine using Visual Studio Code.

Repository Link:

<https://github.com/Abdul1652005/ai-internship-Abdul-Rehman.git>

Part C – Git Fundamentals

README File

Created a README.md file containing:

- Student Name
- Batch
- Domain

Project Files

Added the required project files to the repository.

First Commit

Created the first commit using the following command:

- `git commit -m "Initial project setup"`

Push to GitHub

Uploaded the local repository to GitHub using:

- `git push origin main`

Branch Creation

Created and pushed a new branch named setup-complete using:

- `git checkout -b setup-complete`
`git push -u origin setup-complete`

The screenshot shows a VS Code interface with a terminal window. The Explorer pane on the left shows a project named 'AI-INTERNSHIP-ABDUL-REHMAN' with files like .gitignore, LICENSE, README.md, and welcome.py. The terminal window shows the following commands and output:

```
PS C:\Users\abdul\OneDrive\Desktop\TASK 01 INTERNSHIP\ai-internship-Abdul-Rehman> git status
On branch main
Your branch is up to date with 'origin/main'.

Changes to be committed:
  (use "git restore --staged <file>..." to unstage)
        new file:   .gitignore
        modified:   README.md
        new file:   welcome.py

PS C:\Users\abdul\OneDrive\Desktop\TASK 01 INTERNSHIP\ai-internship-Abdul-Rehman> git commit -m "Initial Project Setup"
[main be15935] Initial Project Setup
3 files changed, 31 insertions(+), 1 deletion(-)
create mode 100644 .gitignore
create mode 100644 welcome.py

PS C:\Users\abdul\OneDrive\Desktop\TASK 01 INTERNSHIP\ai-internship-Abdul-Rehman> git push origin main
Enumerating objects: 7, done.

remote:
To https://github.com/Abdul1652005/ai-internship-Abdul-Rehman.git
* [new branch]      setup-complete -> setup-complete
branch 'setup-complete' set up to track 'origin/setup-complete'.
```

Screenshot showing the successful push to GitHub.

Bonus Task

Created a Python program (welcome.py) that asks the user for their name and displays a welcome message.

The screenshot shows a VS Code interface with a terminal window. The terminal shows the following commands and output:

```
PS C:\Users\abdul\OneDrive\Desktop\TASK 01 INTERNSHIP\ai-internship-Abdul-Rehman> (Set-ExecutionPolicy -Scope Process -ExecutionPolicy RemoteSigned) ; (& "c:\Users\abdul\OneDrive\Desktop\TASK 01 INTERNSHIP\ai-internship-Abdul-Rehman\venv\Scripts\Activate.ps1")
(venv) PS C:\Users\abdul\OneDrive\Desktop\TASK 01 INTERNSHIP\ai-internship-Abdul-Rehman> & "c:\Users\abdul\OneDrive\Desktop\TASK 01 INTERNSHIP\ai-internship-Abdul-Rehman\venv\Scripts\python.exe" "c:/Users/abdul/OneDrive/Desktop/TASK 01 INTERNSHIP/ai-internship-Abdul-Rehman/welcome.py"
Enter Your Name : Abdul Rehman
Welcome ! Abdul Rehman to AI & Software Development Internship Program
(venv) PS C:\Users\abdul\OneDrive\Desktop\TASK 01 INTERNSHIP\ai-internship-Abdul-Rehman>
```

Conclusion

This assignment successfully established a complete Python development environment and GitHub workflow. Python 3.11, Visual Studio Code, and the required extensions were installed, a virtual environment was created and activated, and a GitHub repository was set up and cloned. Basic Git operations, including creating a README file, committing changes, pushing to GitHub, and creating a new branch, were completed successfully. Additionally, a simple Python program was developed as the bonus task, demonstrating a functional development setup for future AI projects.
